**Sustainable investment** means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

### To what extent were the environmental and/or social characteristics promoted by this financial product met?

The environmental and social characteristics promoted by the Sub-Fund were met.

The Sub-Fund promoted environmental and social characteristics and invested in issuers that the Investment Manager considered well-prepared to handle financially material environmental and social challenges. Issuers were selected based on the Investment Manager’s ESG framework, as described in the pre-contractual disclosure annex for the Sub-Fund.

The Sub-Fund has not designated a reference benchmark for the purpose of attaining the environmental and social characteristics that it promotes.

#### How did the sustainability indicators perform?

During the reference period, the attainment of the environmental and social characteristics promoted by the Sub-Fund has been measured with the sustainability indicators, as presented in the table below:

*The EU Taxonomy sets out a “do no significant harm” principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.*

*The “do no significant harm” principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.*

*Any other sustainable investments must also not significantly harm any environmental or social objectives.*

## How did this financial product consider principal adverse impacts on sustainability factors?

The Investment Manager considered the following adverse sustainability indicators for the Sub-Fund’s investment strategy:

Table	Number	Principal Adverse Impact Indicator
1	1	Scope 1 GHG emissions
1	1	Scope 2 GHG emissions
1	1	Total GHG emissions (Scope 1 and 2)
1	3	GHG intensity of investee companies
1	7	Activities negatively affecting biodiversity-sensitive areas
1	10	Share of investments in investee companies that have been involved in violations of the UNGC principles or OECD Guidelines for Multinational Enterprises
1	13	Board gender diversity
1	14	Share of investments in investee companies involved in the manufacture or selling of controversial weapons

The Investment Manager applied a process to identify issuers that are exposed to principal adverse impacts on sustainability factors based on in-house research and/or external data sources, including ESG data providers, news alerts, and the issuers themselves.

No investment was identified as having a critical and poorly managed impact in any of the principal adverse impacts areas considered.

**Principal adverse impacts** are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

The portfolio proportions of investments presented above are an average over the reference period.

2.64% of the total value of investments (NAV) were in companies involved in sectors that could be connected to non-renewable energy sources, such as "Electricity, gas, steam and air conditioning supply (NACE code D)", "Mining and quarrying (NACE code B)" or "Manufacture of coke and refined petroleum products (NACE code C19)". It's important to note that even companies categorized under different NACE codes might still have some involvement with non-renewable energy-related activities, even if it's not their main focus. Additionally, the Sub-Fund might invest in bonds labeled as green, social, or sustainability bonds. These bonds typically fund projects unrelated to non-renewable energy, even if the companies issuing them can be active in sectors with potential links to non-renewable energy sources.

### To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

#### ● **Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy?<sup>1</sup>**

To comply with the EU Taxonomy, the criteria for fossil gas include

Yes

In fossil gas

In nuclear energy

<sup>1</sup> Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective -see explanatory note in the left-hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

No

**Enabling activities** directly enable other activities to make a substantial contribution to an environmental objective.

**Transitional activities** are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

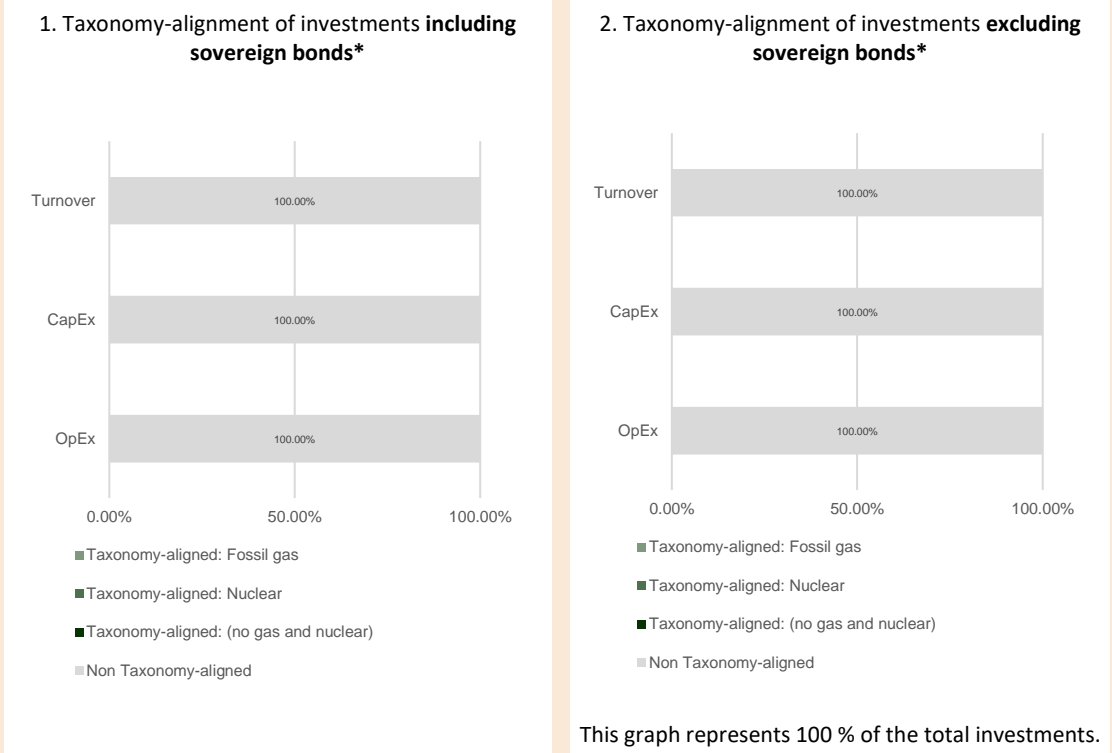

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies.

- **capital expenditure (CapEx)** showing the green investments made by investee companies, e.g for a transition to a green economy.

- **operational expenditure (OpEx)** reflecting green operational activities of investee companies.

*The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds\*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.*

\* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures

**What was the share of investments made in transitional and enabling activities?**

The share of investments made in transitional and enabling activities was 0 %.
